

API Documentation

Customer Service & Online User Management

Overview

Dokumen ini disusun mengikuti format spesifikasi API: URL, HTTP Method, Path, Protocol, Header, Request Body/Query Parameter, Sample Request, Response Success, dan Response Failed.

General Response Format

```
{
  "message": "string",
  "data": {},
  "pagination": {
    "current_page": 1,
    "per_page": 10,
    "total_items": 100,
    "total_pages": 10
  }
}
```

Catatan: object pagination hanya muncul pada endpoint list yang memakai parameter page dan size. Sebagian endpoint mengembalikan file binary atau plain text sesuai implementasi.

Status Code Reference

HTTP Status	Description
200 OK	Request success
204 No Content	Preflight OPTIONS success
400 Bad Request	Invalid request/parameter
401 Unauthorized	Invalid or expired token/session
404 Not Found	Data not found
409 Conflict	Duplicate data / pending approval / conflict
500 Internal Server Error	Unexpected server/database/package error

Endpoint Summary

No	Group	Method	Path	Auth
1	Customer Service	POST	/cs/login	No token
2	Customer Service	POST	/cs/logout	Bearer Token
3	Customer Service	POST	/cs/reset-password	No token
4	Customer Service	POST	/cs/create-customer-service-account	Bearer Token
5	Customer Service	PUT	/cs/update-customer-service-account	Bearer Token
6	Customer Service	PUT	/cs/change-password-customer-service-account	Bearer Token
7	Customer Service	DELETE	/cs/delete-customer-service-account	Bearer Token
8	Customer Service	GET	/cs/get-list-customer-service	Bearer Token
9	Customer Service	GET	/cs/get-list-customer-service-suggestion	Bearer Token
10	Customer Service	GET	/cs/get-customer-service-logs	Bearer Token
11	Customer Service	GET	/cs/get-customer-service-logs-suggestion	Bearer Token
12	Customer Service	GET	/cs/get-campaigns	Bearer Token
13	Online User	GET	/online/get-list-link-account	Bearer Token
14	Online User	GET	/online/get-list-online-user	Bearer Token
15	Online User	GET	/online/get-list-online-user-suggestion	Bearer Token
16	Online User	GET	/online/get-linked-account-online-user	Bearer Token
17	Online User	GET	/online/get-approval-linked-account-online-user	Bearer Token
18	Online User	GET	/online/get-list-approval-online-user	Bearer Token
19	Online User	GET	/online/get-list-approval-online-user-suggestion	Bearer Token
20	Online User	GET	/online/get-list-opening-rekening-online-user	Bearer Token
21	Online User	GET	/online/get-list-opening-rekening-online-user-suggestion	Bearer Token
22	Online User Approval	POST	/online/create-approval-login	Bearer Token
23	Online User Approval	POST	/online/approve-approval-login	Bearer Token
24	Online User Email/Reset	POST	/online/send-email-forget-password-and-pin-online-user	No token
25	Online User Email/Reset	POST	/online/send-email-opening-account	No token
26	Online User Email/Reset	POST	/online/send-email-opening-account-with-rekening	No token
27	Online User Email/Reset	PUT	/online/update-status-online-user	Bearer Token
28	Online User Email/Reset	POST	/online/forget-password-online-user	No token
29	Online User Email/Reset	POST	/online/forget-PIN-online-user	No token
30	Online User Email/Reset	POST	/online/change-password-and-pin-online-user	Bearer Token
31	Online User	POST	/online/ask-me	No token
32	Online User Registration	POST	/online/register-account-online-user	No token
33	Online User Registration	POST	/online/resend-otp-register-account-online-user	No token
34	Online User Registration	POST	/online/validate-otp-register-account-online-user	No token
35	Verify Email	POST	/online/request-verify-email	No token
36	Verify Email	POST	/online/validate-verify-email	No token
37	Verify Email	POST	/online/resend-otp-verify-email	No token
38	Auto Update	GET	/auto-update/get-list-hash-binary-file	No token
39	Auto Update	GET	/auto-update/get-binary-file	No token
40	OTP	POST	/otp/send-login-email	No token

Customer Service

1. CS Login

URL	https://{BASE_URL}/cs/login
HTTP Method	POST
Path	/cs/login
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Password	P@ssw0rd	string	100	Yes	Password plain text; server will encrypt before database operation

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Password": "P@ssw0rd"
}
```

Response Success

```
{
  "message": "Login successfully.",
  "data": {
    "LoginId": "csadmin",
    "EmployeeId": "EMP001",
    "Email": "cs@example.com",
    "Status": 1,
    "Permissions": 511,
    "Token": "JWT_TOKEN"
  }
}
```

Response Failed

```
{
  "message": "Login failed, password not match.",
  "data": {}
}
```

2. CS Logout

URL	https://{BASE_URL}/cs/logout
HTTP Method	POST
Path	/cs/logout
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID

Sample Request Body

```
{
  "LoginId": "csadmin"
}
```

Response Success

```
{
  "message": "Logout successfully.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Your session has expired. Please log in again to continue.",
  "data": {}
}
```

3. Reset Password Customer Service Account

URL	https://{BASE_URL}/cs/reset-password
HTTP Method	POST
Path	/cs/reset-password
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID

Sample Request Body

```
{
  "LoginId": "csadmin"
}
```

Response Success

```
{
  "message": "Successfully reset password customer service account, please check your email.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Failed, loginId csadmin is not exist.",
  "data": {}
}
```

4. Create Customer Service Account

URL	https://{BASE_URL}/cs/create-customer-service-account
HTTP Method	POST

Path	/cs/create-customer-service-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
EmployeeId	EMP001	string	50	Yes	Employee ID
Email	user@example.com	string	255	Yes	Email address
Permissions	511	number	-	Yes	Permission bitmask
CreatedBy	csadmin	string	50	Yes	User who creates the data

Sample Request Body

```
{
  "LoginId": "csadmin",
  "EmployeeId": "EMP001",
  "Email": "user@example.com",
  "Permissions": 511,
  "CreatedBy": "csadmin"
}
```

Response Success

```
{
  "message": "Successfully created customer service account.",
  "data": {
    "LoginId": "cs001",
    "EmployeeId": "EMP001",
    "Email": "cs001@example.com",
    "Status": 1,
    "Permissions": 511,
    "Created": "2026-07-08 10:00:00",
    "LastModified": "",
    "LastLogin": "",
    "CreatedBy": "csadmin",
    "ModifiedBy": ""
  }
}
```

Response Failed

```
{
  "message": "Failed, loginId cs001 is exist.",
  "data": {}
}
```

5. Update Customer Service Account

URL	https://{BASE_URL}/cs/update-customer-service-account
HTTP Method	PUT
Path	/cs/update-customer-service-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
EmployeeId	EMP001	string	50	Yes	Employee ID
Email	user@example.com	string	255	Yes	Email address
Permissions	511	number	-	Yes	Permission bitmask
Status	1	number	1	Yes	Status account: 0=Inactive, 1=Active, 2=Suspend Trading, 3=Suspend Login
ModifiedBy	csadmin	string	50	Yes	User who modifies the data

Sample Request Body

```
{
  "LoginId": "csadmin",
  "EmployeeId": "EMP001",
  "Email": "user@example.com",
  "Permissions": 511,
  "Status": 1,
  "ModifiedBy": "csadmin"
}
```

Response Success

```
{
  "message": "Successfully update customer service account.",
  "data": {
    "LoginId": "cs001",
    "EmployeeId": "EMP001",
    "Email": "cs001@example.com",
    "Status": 1,
    "Permissions": 511,
    "LastModified": "2026-07-08 10:00:00",
    "ModifiedBy": "csadmin"
  }
}
```

Response Failed

```
{
  "message": "Failed, loginId cs001 is not exist.",
  "data": {}
}
```

6. Change Password Customer Service Account

URL	https://{BASE_URL}/cs/change-password-customer-service-account
HTTP Method	PUT
Path	/cs/change-password-customer-service-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Password	P@ssw0rd	string	100	Yes	Password plain text; server will encrypt before database operation
ModifiedBy	csadmin	string	50	Yes	User who modifies the data

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Password": "P@ssw0rd",
  "ModifiedBy": "csadmin"
}
```

Response Success

```
{
  "message": "Successfully change password customer service account.",
  "data": {
    "LoginId": "cs001",
    "LastModified": "2026-07-08 10:00:00",
    "ModifiedBy": "csadmin"
  }
}
```

Response Failed

```
{
  "message": "Failed to change password customer service account.",
  "data": {}
}
```

7. Delete Customer Service Account

URL	https://{BASE_URL}/cs/delete-customer-service-account
HTTP Method	DELETE
Path	/cs/delete-customer-service-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
loginId	csadmin	string	50	No	Filter User ID / Login ID
modifiedBy	csadmin	string	50	No	User who deletes/modifies the data

Sample Request

DELETE https://{BASE_URL}/cs/delete-customer-service-account?loginId=csadmin&modifiedBy=csadmin

Response Success

```
{
  "message": "Successfully delete customer service account.",
  "data": {
    "LoginId": "cs001",
    "ModifiedBy": "csadmin"
  }
}
```

Response Failed

```
{
  "message": "Failed, loginId cs001 is not exist.",
  "data": {}
}
```

8. Get List Customer Service

URL	https://{BASE_URL}/cs/get-list-customer-service
HTTP Method	GET
Path	/cs/get-list-customer-service
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1
loginId	csadmin	string	50	No	Filter User ID / Login ID
employeeId	EMP001	string	50	No	Filter Employee ID

Sample Request

GET https://{BASE_URL}/cs/get-list-customer-service?page=1&size=10&loginId=csadmin&employeeId=EMP001

Response Success

```
{
  "message": "Successfully retrieved customer service list",
  "data": [
    {
      "LoginId": "csadmin",
      "EmployeeId": "EMP001",
      "Email": "user@example.com",
      "Status": 1,
      "Permissions": 511,
      "Created": "string",
      "LastModified": "string",
      "LastLogin": "string",
      "CreatedBy": "csadmin",
      "ModifiedBy": "csadmin"
    }
  ],
  "pagination": {
    "current_page": 1,
    "per_page": 10,
    "total_items": 1,
    "total_pages": 1
  }
}
```

Response Failed

```
{
  "message": "Invalid pagination parameters.",
  "data": {}
}
```

9. Get List Customer Service Suggestion

URL	https://{BASE_URL}/cs/get-list-customer-service-suggestion
HTTP Method	GET
Path	/cs/get-list-customer-service-suggestion
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
loginId	csadmin	string	50	No	Filter User ID / Login ID
employeeId	EMP001	string	50	No	Filter Employee ID

Sample Request

GET https://{BASE_URL}/cs/get-list-customer-service-suggestion?loginId=csadmin&employeeId=EMP001

Response Success

```
{
  "message": "Successfully retrieved customer service list suggestion",
  "data": [
    {
      "LoginId": "csadmin",
      "EmployeeId": "EMP001"
    }
  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

10. Get Customer Service Logs

URL	https://{BASE_URL}/cs/get-customer-service-logs
HTTP Method	GET
Path	/cs/get-customer-service-logs
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1
csLoginId	csadmin	string	50	No	Filter customer service login ID
loginId	csadmin	string	50	No	Filter User ID / Login ID
logType	-1	number	-	No	Log type filter; -1 = all

Sample Request

GET https://{BASE_URL}/cs/get-customer-service-logs?page=1&size=10&csLoginId=csadmin&loginId=csadmin&logType=-1

Response Success

```
{
```

```

"message": "Successfully retrieved customer service logs data",
"data": [
  {
    "LogId": 1,
    "CSLoginId": "csadmin",
    "LoginId": "csadmin",
    "LogTime": "string",
    "ApprovalId": 1001,
    "LogType": 1,
    "LogDesc": "string"
  }
],
"pagination": {
  "current_page": 1,
  "per_page": 10,
  "total_items": 1,
  "total_pages": 1
}
}

```

Response Failed

```

{
  "message": "Invalid pagination parameters.",
  "data": {}
}

```

11. Get Customer Service Logs Suggestion

URL	https://{BASE_URL}/cs/get-customer-service-logs-suggestion
HTTP Method	GET
Path	/cs/get-customer-service-logs-suggestion
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
csLoginId	csadmin	string	50	No	Filter customer service login ID
loginId	csadmin	string	50	No	Filter User ID / Login ID

Sample Request

GET https://{BASE_URL}/cs/get-customer-service-logs-suggestion?csLoginId=csadmin&loginId=csadmin

Response Success

```

{
  "message": "Successfully retrieved customer service logs data",
  "data": [
    {
      "CSLoginId": "csadmin",
      "LoginId": "csadmin"
    }
  ]
}

```

Response Failed

```

{
  "message": "Internal server error.",
  "data": {}
}

```

12. Get Campaigns

URL	https://{BASE_URL}/cs/get-campaigns
HTTP Method	GET
Path	/cs/get-campaigns
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1

Sample Request

GET https://{BASE_URL}/cs/get-campaigns?page=1&size=10

Response Success

```
{
  "message": "Successfully retrieved campaigns data",
  "data": [
    {
      "Id": 1,
      "Title": "string",
      "Body": "string",
      "ImageUrl": "string",
      "DeepLink": "string",
      "StartDate": "string",
      "EndDate": "string",
      "DisplayType": "string",
      "IsActive": true,
      "IsPriority": true,
      "CreatedAt": "string",
      "UpdatedAt": "string"
    }
  ],
  "pagination": {
    "current_page": 1,
    "per_page": 10,
    "total_items": 1,
    "total_pages": 1
  }
}
```

Response Failed

```
{
  "message": "Invalid pagination parameters.",
  "data": {}
}
```

Online User

13. Get List Link Account

URL	https://{BASE_URL}/online/get-list-link-account
HTTP Method	GET
Path	/online/get-list-link-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request

No request body or query parameter.

Response Success

```
{
  "message": "Successfully retrieved list link account",
  "data": [
    {
      "CustId": "CUST001",
      "Name": "string",
      "StaffId": "string",
      "Branch": "string"
    }
  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

14. Get List Online User

URL	https://{BASE_URL}/online/get-list-online-user
HTTP Method	GET
Path	/online/get-list-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1
loginId	csadmin	string	50	No	Filter User ID / Login ID
email	user@example.com	string	255	No	Filter email address

Sample Request

GET https://{BASE_URL}/online/get-list-online-user?page=1&size=10&loginId=csadmin&email=user@example.com

Response Success

```
{
  "message": "Successfully retrieved online user list",
  "data": [
    {
      "LoginId": "csadmin",
      "Email": "user@example.com",
      "Status": 1,
      "LoginType": "1",
      "Permissions": 511,
      "SalesId": "SALES001",
      "AccountExpired": "2026-12-31 23:59:59",
      "Created": "string",
      "BirthDate": "1981-11-02",
      "PhoneNumber": "081234567890",
      "ErrorPwdRetry": 1,
      "ErrorPinRetry": 1,
      "IsEmailApproved": true,
      "EmailApprovedAt": "string",
      "IsPhoneNumberApproved": true,
      "PhoneNumberApprovedAt": "string"
    }
  ],
  "pagination": {
    "current_page": 1,
    "per_page": 10,
    "total_items": 1,
    "total_pages": 1
  }
}
```

Response Failed

```
{
  "message": "Invalid pagination parameters.",
  "data": {}
}
```

15. Get List Online User Suggestion

URL	https://{BASE_URL}/online/get-list-online-user-suggestion
HTTP Method	GET
Path	/online/get-list-online-user-suggestion
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
loginId	csadmin	string	50	No	Filter User ID / Login ID
email	user@example.com	string	255	No	Filter email address

Sample Request

GET https://{BASE_URL}/online/get-list-online-user-suggestion?loginId=csadmin&email=user@example.com

Response Success

```
{
  "message": "Successfully retrieved online user list suggestion.",
  "data": [
    {

```

```

    "LoginId": "csadmin",
    "Email": "user@example.com"
  }
}

```

Response Failed

```

{
  "message": "Internal server error.",
  "data": {}
}

```

16. Get Linked Account Online User

URL	https://{BASE_URL}/online/get-linked-account-online-user
HTTP Method	GET
Path	/online/get-linked-account-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
loginId	csadmin	string	50	Yes	Filter User ID / Login ID

Sample Request

GET https://{BASE_URL}/online/get-linked-account-online-user?loginId=csadmin

Response Success

```

{
  "message": "Successfully retrieved linked account online user",
  "data": [
    {
      "AccountId": "ACC001",
      "AccountName": "John Doe",
      "Created": "string",
      "CreatedBy": "csadmin"
    }
  ]
}

```

Response Failed

```

{
  "message": "Invalid parameters, loginId can't be empty.",
  "data": {}
}

```

17. Get Approval Linked Account Online User

URL	https://{BASE_URL}/online/get-approval-linked-account-online-user
HTTP Method	GET
Path	/online/get-approval-linked-account-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
approvalId	1001	number	-	Yes	Approval ID

Sample Request

GET https://{BASE_URL}/online/get-approval-linked-account-online-user?approvalId=1001

Response Success

```
{
  "message": "Successfully retrieved approval linked account online user",
  "data": [
    {
      "AccountId": "ACC001",
      "AccountName": "John Doe",
      "ActionType": "1",
      "Created": "string",
      "CreatedBy": "csadmin"
    }
  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

18. Get List Approval Online User

URL	https://{BASE_URL}/online/get-list-approval-online-user
HTTP Method	GET
Path	/online/get-list-approval-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1
actionType	-1	number	-	No	Action type filter; -1 = all
status	string	string	-	No	
loginId	csadmin	string	50	No	Filter User ID / Login ID
createdBy	string	string	-	No	

Sample Request

GET https://{BASE_URL}/online/get-list-approval-online-user?page=1&size=10&actionType=-1&status=sample&loginId=csadmin&createdBy=sample

Response Success

```
{
  "message": "Successfully retrieved approval online user list",

  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

20. Get List Opening Rekening Online User

URL	https://{BASE_URL}/online/get-list-opening-rekening-online-user
HTTP Method	GET
Path	/online/get-list-opening-rekening-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
page	1	number	-	Yes	Current page, minimum 1
size	10	number	-	Yes	Rows per page, minimum 1
custId	CUST001	string	50	No	Filter customer ID
loginId	csadmin	string	50	No	Filter User ID / Login ID

Sample Request

GET https://{BASE_URL}/online/get-list-opening-rekening-online-user?page=1&size=10&custId=CUST001&loginId=csadmin

Response Success

```
{
  "message": "Successfully retrieved opening rekening online user list",
  "data": [
    {
      "LoginId": "csadmin",
      "CustId": "CUST001",
      "Name": "string",
      "Email": "user@example.com",
      "InvestorNo": "string",
      "KSEIID": "string",
      "RDNAccount": "string",
      "RDNBank": "string"
    }
  ],
  "pagination": {
    "current_page": 1,
    "per_page": 10,
    "total_items": 1,
    "total_pages": 1
  }
}
```

Response Failed

```
{
  "message": "Invalid pagination parameters.",
  "data": {}
}
```

21. Get List Opening Rekening Online User Suggestion

URL	https://{BASE_URL}/online/get-list-opening-rekening-online-user-suggestion
-----	--

HTTP Method	GET
Path	/online/get-list-opening-rekening-online-user-suggestion
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
custId	CUST001	string	50	No	Filter customer ID
loginId	csadmin	string	50	No	Filter User ID / Login ID

Sample Request

GET https://{BASE_URL}/online/get-list-opening-rekening-online-user-suggestion?custId=CUST001&loginId=csadmin

Response Success

```
{
  "message": "Successfully retrieved opening rekening online user list suggestion.",
  "data": [
    {
      "CustId": "CUST001",
      "LoginId": "csadmin"
    }
  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

Online User Approval

22. Create Approval Login

URL	https://{BASE_URL}/online/create-approval-login
HTTP Method	POST
Path	/online/create-approval-login
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
LoginType	1	number	1	Yes	Login type
ActionType	1	number	1	Yes	Action approval: 1=Create New Account, 2=Update Account, 3=Delete Account
Permissions	511	number	-	Yes	Permission bitmask
SalesId	SALES001	string	50	Yes	Sales/branch/staff identifier
Email	user@example.com	string	255	Yes	Email address
CreatedBy	csadmin	string	50	Yes	User who creates the data
LoginStatus	1	number	1	Yes	Status account: 0=Inactive, 1=Active, 2=Suspend Trading, 3=Suspend Login
AccountExpired	2026-12-31 23:59:59	string	19	No	Account expired datetime; empty value allowed
ArrayAccountLink	["ACC001","ACC002"]	array	-	No	Account IDs to link
ArrayAccountUnLink	["ACC003"]	array	-	No	Account IDs to unlink
BirthDate	1981-11-02	string	10	Yes	Birth date, format YYYY-MM-DD
HandphoneNo	081234567890	string	20	Yes	Phone number

Sample Request Body

```
{
  "LoginId": "csadmin",
  "LoginType": 1,
  "ActionType": 1,
  "Permissions": 511,
  "SalesId": "SALES001",
  "Email": "user@example.com",

  "AccountExpired": "2026-12-31 23:59:59",
  "ArrayAccountLink": [
    "ACC001",
    "ACC002"
  ],
  "ArrayAccountUnLink": [
    "ACC003"
  ],
  "BirthDate": "1981-11-02",
  "HandphoneNo": "081234567890"
}
```

Response Success

```
{
  "message": "Success to create approval.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Failed, Need approval for loginId user001",
  "data": {}
}
```

23. Approve Approval Login

URL	https://{BASE_URL}/online/approve-approval-login
HTTP Method	POST
Path	/online/approve-approval-login
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
ApprovalId	1001	number	-	Yes	Approval ID
ApprovedBy	csadmin	string	50	Yes	User who approves/rejects approval
Email	user@example.com	string	255	Yes	Email address
LoginId	csadmin	string	50	Yes	User ID / Login ID
Status	1	number	1	Yes	Status account: 0=Inactive, 1=Active, 2=Suspend Trading, 3=Suspend Login
ActionType	1	number	1	Yes	Action approval: 1=Create New Account, 2=Update Account, 3=Delete Account

Sample Request Body

```
{
  "ApprovalId": 1001,
  "ApprovedBy": "csadmin",
  "Email": "user@example.com",
  "LoginId": "csadmin",
  "Status": 1,
  "ActionType": 1
}
```

Response Success

```
{
  "message": "Success to create approval.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Approval status is not open, can't approve",
  "data": {}
}
```

Online User Email/Reset

24. Send Email Forget Password and PIN Online User

URL	https://{BASE_URL}/online/send-email-forget-password-and-pin-online-user
HTTP Method	POST
Path	/online/send-email-forget-password-and-pin-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
CSLoginId	csadmin	string	50	Yes	Customer service login ID
ActionType	1	number	1	Yes	Action approval: 1=Create New Account, 2=Update Account, 3=Delete Account

Sample Request Body

```
{
  "LoginId": "csadmin",
  "CSLoginId": "csadmin",
  "ActionType": 1
}
```

Response Success

```
{
  "message": "Successfully send email forget Password/PIN",
  "data": {}
}
```

Response Failed

```
{
  "message": "Content-Type must be application/json.",
  "data": {}
}
```

25. Send Email Opening Account

URL	https://{BASE_URL}/online/send-email-opening-account
HTTP Method	POST
Path	/online/send-email-opening-account
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID

Field Name	Value	Data Type	Length	Mandatory	Description
CSLoginId	csadmin	string	50	Yes	Customer service login ID

Sample Request Body

```
{
  "LoginId": "csadmin",
  "CSLoginId": "csadmin"
}
```

Response Success

```
{
  "message": "Successfully send email opening account",
  "data": {}
}
```

Response Failed

```
{
  "message": "Content-Type must be application/json.",
  "data": {}
}
```

26. Send Email Opening Account With Rekening

URL	https://{BASE_URL}/online/send-email-opening-account-with-rekening
HTTP Method	POST
Path	/online/send-email-opening-account-with-rekening
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
CSLoginId	csadmin	string	50	Yes	Customer service login ID
CustId	CUST001	string	50	Yes	Customer ID

Sample Request Body

```
{
  "LoginId": "csadmin",
  "CSLoginId": "csadmin",
  "CustId": "CUST001"
}
```

Response Success

```
{
  "message": "Successfully send email opening account with rekening",
  "data": {}
}
```

Response Failed

```
{
  "message": "Content-Type must be application/json.",
  "data": {}
}
```

27. Update Status Online User

URL	https://{BASE_URL}/online/update-status-online-user
HTTP Method	PUT
Path	/online/update-status-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Status	1	number	1	Yes	Status account: 0=Inactive, 1=Active, 2=Suspend Trading, 3=Suspend Login
ModifiedBy	csadmin	string	50	Yes	User who modifies the data

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Status": 1,
  "ModifiedBy": "csadmin"
}
```

Response Success

```
{
  "message": "Success update status online user for loginId user001.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Failed, Invalid status account",
  "data": {}
}
```

28. Forget Password Online User

URL	https://{BASE_URL}/online/forget-password-online-user
HTTP Method	POST
Path	/online/forget-password-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address

Sample Request Body

```
{
  "LoginId": "csadmin",
```

```

    "Email": "user@example.com"
  }

```

Response Success

```

{
  "message": "Success to reset password.",
  "data": {}
}

```

Response Failed

```

{
  "message": "Password was just changed. Please wait and try again later.",
  "data": {}
}

```

29. Forget PIN Online User

URL	https://{BASE_URL}/online/forget-PIN-online-user
HTTP Method	POST
Path	/online/forget-PIN-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address

Sample Request Body

```

{
  "LoginId": "csadmin",
  "Email": "user@example.com"
}

```

Response Success

```

{
  "message": "Success to reset PIN.",
  "data": {}
}

```

Response Failed

```

{
  "message": "PIN was just changed. Please wait and try again later.",
  "data": {}
}

```

30. Change Password and PIN Online User

URL	https://{BASE_URL}/online/change-password-and-pin-online-user
HTTP Method	POST
Path	/online/change-password-and-pin-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Authorization	Bearer {token}	string	Yes	Token from /cs/login
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address
ActionType	1	number	1	Yes	Action approval: 1=Create New Account, 2=Update Account, 3=Delete Account
ModifiedBy	csadmin	string	50	Yes	User who modifies the data

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com",
  "ActionType": 1,
  "ModifiedBy": "csadmin"
}
```

Response Success

```
{
  "message": "Success to change Password for loginId user001.",
  "data": {}
}
```

Response Failed

```
{
  "message": "Invalid action type.",
  "data": {}
}
```

Online User

31. Ask Me

URL	https://{BASE_URL}/online/ask-me
HTTP Method	POST
Path	/online/ask-me
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
AccountId	ACC001	string	50	Yes	Account ID
AccountName	John Doe	string	100	Yes	Account name
Subject	Question Subject	string	255	Yes	Email/request subject
Note	Request note	string	500	Yes	Request note

Sample Request Body

```
{
  "LoginId": "csadmin",
  "AccountId": "ACC001",
  "AccountName": "John Doe",
  "Subject": "Question Subject",
  "Note": "Request note"
}
```

Response Success

```
{
  "message": "Successfully send request",
  "data": {}
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

Online User Registration

32. Register Account Online User

URL	https://{BASE_URL}/online/register-account-online-user
HTTP Method	POST
Path	/online/register-account-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address
PhoneNumber	081234567890	string	20	Yes	Phone number
BirthDate	1981-11-02	string	10	Yes	Birth date, format YYYY-MM-DD

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com",
  "PhoneNumber": "081234567890",
  "BirthDate": "1981-11-02"
}
```

Response Success

```
{
  "message": "Registration successful! An OTP has been sent to your email. Please check your inbox and verify your account.",
  "data": {
    "LoginId": "user001",
    "Email": "user@example.com",
    "ExpiredAt": "2026-07-08 10:30:00"
  }
}
```

Response Failed

```
{
  "message": "The Username, Email, or Phone number you provided is already registered.",
  "data": {}
}
```

33. Resend OTP Register Account Online User

URL	https://{BASE_URL}/online/resend-otp-register-account-online-user
HTTP Method	POST
Path	/online/resend-otp-register-account-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com"
}
```

Response Success

```
{
  "message": "Successful, An OTP has been sent to your email. Please check your inbox and verify your account.",
  "data": {

  }
}
```

Response Failed

```
{
  "message": "Registration data for this account was not found. Please ensure you have completed the initial registration steps.",
  "data": {}
}
```

34. Validate OTP Register Account Online User

URL	https://{BASE_URL}/online/validate-otp-register-account-online-user
HTTP Method	POST
Path	/online/validate-otp-register-account-online-user
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
Email	user@example.com	string	255	Yes	Email address
OTPCode	123456	string	10	Yes	OTP code

Sample Request Body

```
{
  "Email": "user@example.com",
  "OTPCode": "123456"
}
```

Response Success

```
{
  "message": "OTP validated. Your registration request has been submitted and is currently awaiting approval.",
  "data": {}
}
```

Response Failed

```
{  
  "message": "Invalid verification code. Please check the code sent to your email.",  
  "data": {}  
}
```

Verify Email

35. Request Verify Email

URL	https://{BASE_URL}/online/request-verify-email
HTTP Method	POST
Path	/online/request-verify-email
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com"
}
```

Response Success

```
{
  "message": "An OTP has been sent to your email. Please check your inbox and verify your account.",

  "data": {}
}
```

36. Validate Verify Email

URL	https://{BASE_URL}/online/validate-verify-email
HTTP Method	POST
Path	/online/validate-verify-email
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID

Field Name	Value	Data Type	Length	Mandatory	Description
Email	user@example.com	string	255	Yes	Email address
OTPCode	123456	string	10	Yes	OTP code

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com",
  "OTPCode": "123456"
}
```

Response Success

```
{
  "message": "Email verified successfully.",
  "data": {
    "LoginId": "user001",
    "Email": "user@example.com"
  }
}
```

Response Failed

```
{
  "message": "Invalid OTP. Please insert correct OTP from your email.",
  "data": {}
}
```

37. Resend OTP Verify Email

URL	https://{BASE_URL}/online/resend-otp-verify-email
HTTP Method	POST
Path	/online/resend-otp-verify-email
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
Email	user@example.com	string	255	Yes	Email address

Sample Request Body

```
{
  "LoginId": "csadmin",
  "Email": "user@example.com"
}
```

Response Success

```
{
  "message": "An OTP has been sent to your email. Please check your inbox and verify your account.",
  "data": {
    "LoginId": "user001",
    "Email": "user@example.com",
    "ExpiredAt": "2026-07-08 10:30:00"
  }
}
```

Response Failed

```
{
  "message": "Internal server error.",
}
```

```
"data": {}  
}
```

Auto Update

38. Get List Hash Binary File

URL	https://{BASE_URL}/auto-update/get-list-hash-binary-file
HTTP Method	GET
Path	/auto-update/get-list-hash-binary-file
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
-	-	-	No	No specific header required by source code

Request

No request body or query parameter.

Response Success

```
{
  "message": "Successfully retrieved list hash binary file",
  "data": [
    {
      "fileName": "app.bin",
      "fileHash": "string"
    }
  ]
}
```

Response Failed

```
{
  "message": "Internal server error.",
  "data": {}
}
```

39. Get Binary File

URL	https://{BASE_URL}/auto-update/get-binary-file
HTTP Method	GET
Path	/auto-update/get-binary-file
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
-	-	-	No	No specific header required by source code

Request Query Parameter

Field Name	Value	Data Type	Length	Mandatory	Description
fileName	app.bin	string	255	Yes	Binary file name
isCompressPackage	false	boolean	-	No	true to compress response package

Sample Request

GET https://{BASE_URL}/auto-update/get-binary-file?fileName=app.bin&isCompressPackage=false

Response Success

Binary response: Content-Type application/octet-stream; Content-Disposition attachment; body contains binary file bytes.

Response Failed

400 Failed, bad request / 404 Failed, binary file {fileName} not found / 500 Internal server error.

OTP

40. Send Login OTP Email

URL	https://{BASE_URL}/otp/send-login-email
HTTP Method	POST
Path	/otp/send-login-email
Protocol	REST

Header

Field Name	Value	Data Type	Mandatory	Description
Content-Type	application/json	string	Yes	Content type

Request Body

Field Name	Value	Data Type	Length	Mandatory	Description
LoginId	csadmin	string	50	Yes	User ID / Login ID
